A big Hi to everyone in San Francisco from Adelaide, South Australia.

I hope INTEROP is going along well. I just wish I could be there myself. I was hoping to be at INTEROP 93 August (since I enjoyed it so much as a volunteer last year for Interop 92 Fall that I wanted to return) but unfortunately I couldn't make it. Maybe I might make it to Paris in a few months with any luck.

Anyway, I must say that this idea of global tax and the like is excellent. I hope this demo is a huge success.

Cheers, Grant

## How to Stay Stressed

STRESS HELPS YOU SEEM IMPORTANT.

Anyone as stressed as you must be working very hard and, therefore, is probably doing something very crucial.

IT HELPS YOU TO MAINTAIN PERSONAL DISTANCE AND AVOID INTIMACY.

Anyone as busy as you are certainly can't be expected to form emotional attachments to anyone. And let's face it, you're not much fun to be around anyway.

IT HELPS YOU AVOID RESPONSIBILITIES.

Obviously you're too stressed to be given any more work. This gets you off the hook for all the mundane chores; let someone else take care of them.

IT GIVES YOU A CHEMICAL RUSH.

Stress might be considered a cheap thrill, and you can give yourself a "hit" anytime you choose. But be careful, you might get addicted to your own adrenaline.

IT HELPS YOU AVOID SUCCESS.

Why risk being "successful" when by simply staying stressed you can avoid all of that? Stress can keep your performance level low enough that success won't ever be a threat.

STRESS ALSO LETS YOU KEEP YOUR AUTHORITARIAN MANAGEMENT STYLE.

The authoritarian style of "Just do what I say!" is generally permissible under crisis conditions. If you maintain a permanently stressed crisis atmosphere, you can justify an authoritarian style all the time.

Don't take it easy!

Cari said that messages from non-US places were particularly welcome, so here's a greeting from the Republic of Texas: Rowdy, y'all!!! Mercy, but that's a bodaciouslously long e-mail address.

Kudos to Cari and Marshall for their efforts to demonstrate the usefulness of the Internet to the world at large.

I hope this copy gets through. The one I sent yesterday failed when the fax modem couldn't get carrier from the receiving end.

Hello-

I am working on getting remote printing set up for NASA's Goddard Space Flight Center with several other folks here. It's not only good for internal use, but for enabling outsiders (vendors, colleagues, scientists, etc.) to send e-mail to people here at Goddard that only have fax.

My hearty thanks to Carl Malamud and Marshall Rose for instigating this new use of the Internet.

Enjoy Interop!

Carl,  
Greetings from the PRB, your past employers. I didn't know you, but your reputation lingers ;-)

Anyway good luck with the project, I like it a lot. You came on line just two days after I had to spend \$20 at a copy shop to send a ten page fax to Amsterdam. I wish you'd been there then. System works great.
